

"The new debeader is an unbelievable tool. So, so much easier to use. No beating with sledge hammers or two men to hold it in place. Incredible."

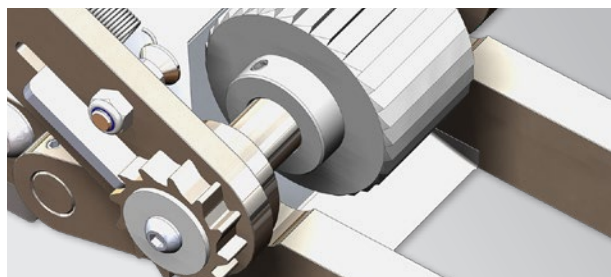

PSS Hire, UK

EXTERNAL DEBEADERS

External Debeader 1200mm

A high quality tool designed for the removal of external beads formed as a result of the butt fusion welding process, for large diameter HDPE pipe sizes 710-1200mm.

The tool will peel the bead away from the pipe's surface whether it's hot or cold, leaving a flush finish and enabling the pipe to be smoothly slip-lined into a larger diameter pipe, as well as a closer inspection of the weld to detect potential defects.

Large blade for up to 60mm bead width.

FEATURES

- Simple and easy to use
- Adjustable guides for correct pipe diameter 710mm-1200mm
- Bead width up to 60mm
- Robust manufacturing
- Spare blade included
